

# Get a COVID-19 vaccine

COVID-19 vaccines are effective at protecting you from COVID-19, especially severe illness and death. COVID-19 vaccines reduce the risk of people spreading the virus that causes COVID-19.

**IT'S SAFE!**

IT WILL HELP  
**PROTECT**  
YOU AND YOUR FAMILY

**IT'S FREE!**

## WHAT TO EXPECT

### On the arm where you got the shot:

- Pain
- Redness
- Swelling

### In the rest of your body:

- Tiredness
- Headache
- Muscle pain
- Chills
- Fever
- Nausea

## REMEMBER

[Learn more](#)

- Side effects can affect your ability to do daily activities, but they should go away in a few days.
- The Pfizer-BioNTech COVID-19 Vaccine and Moderna COVID-19 Vaccine both need 2 shots in order to get the most protection. You should get the second shot even if you have side effects after the first shot, unless a vaccination provider or your doctor tells you not to get it.
- People are considered fully vaccinated two weeks after their second shot of the Pfizer-BioNTech or Moderna COVID-19 vaccine, or two weeks after the single-dose J&J/Janssen COVID-19 vaccine.

If you are fully vaccinated, you can participate in many of the activities that you did prior to the pandemic.
